PREFACE

This report presents the results of an Air Force occupational survey of AFCC Maintenance/Engineering Installation (EI) Workload Control functions. This survey was requested by AFCC/CV to aid in determining if AFCC's Maintenance/EI Workload Control functions should continue with their present way of operation (one where numerous AFSCs perform) or create one or more new AFSCs to perform in these functions.

The survey instrument used in this project was developed by Chief Master Sergeant James T. Duffy, Inventory Development Specialist. Ms Olga Velez provided computer support for this project. Chief Master Sergeant James T. Duffy analyzed the survey data and wrote the report. Administrative support was provided by Ms Anita R. Carter. This report was reviewed by Lieutenant Colonel Charles D. Gorman, Chief, Airman Analysis Branch, Occupational Analysis Division, USAF Occupational Measurement Center.

Copies of this report are distributed to Air Staff sections, Air Force Communications Command, and other interested training and management personnel. Additional copies are available upon request to the USAF Occupational Measurement Center, Attention: Chief, Occupational Analysis Division (OMY), Randolph AFB, Texas 78150-5000.

Center

SUMMARY OF RESULTS

1. Survey Coverage: Of the 1,080 enlisted members in AFCC Maintenance/EI Workload Control functions, 892, or 83 percent of the total population, were in the final survey sample. One hundred percent of personnel sampled were assigned to AFCC.

2. Specialty Jobs: Analysis of the AFCC Maintenance/EI Workload Control functions identified four clusters and three independent job types (IJT):

- Job Controllers Cluster
- NCOIC Cluster
- Readiness Center Controllers Cluster
- EI Workload Control Personnel Cluster
- Plans and Scheduling Personnel IJT
- Administrative Supervisor's IJT
- Vehicle Control NCO IJT

A majority of incumbents, having AFSCs in 30 different specialties, were found performing tasks related to the areas within Maintenance/EI Workload Control functions; i.e., Job Control, Plans and Scheduling, EI Workload Control or Readiness Centers. Only the Administrative Supervisors are performing primarily supervisory tasks, but they represent less than 1 percent of the survey sample.

3. Implications: Analysis of occupational survey data indicates there are a number of jobs in the Maintenance/EI Workload Control functional areas which suggest that one or more lateral AFSCs could be described and managed.

OCCUPATIONAL SURVEY REPORT
AFCC MAINTENANCE/EI WORKLOAD CONTROL FUNCTIONS

INTRODUCTION

This is a report of an occupational survey of the AFCC Maintenance/EI Workload Control Functions completed by the Occupational Analysis Division, USAF Occupational Measurement Center, in September 1986. This is a special report requested by AFCC/CV to provide data to AFCC/LG that will enable them to make a decision regarding the operation of their Maintenance/EI Workload Control Functions; that is, to continue operating under the present system (currently, personnel in 30 different AFSCs perform in these functions), or to create one or more new AFSCs to perform the functions.

SURVEY METHODOLOGY

Inventory Development

The data collection instrument for this survey was USAF Job Inventory AFPT 70-000-782, dated September 1985. A tentative task list was prepared by the Inventory Developer after reviewing tasks from previous occupational surveys of AFSCs belonging to AFCC that contained a Maintenance Control or Job Control job group. To ensure full coverage of the variety of tasks performed by members of the Maintenance/EI Workload Control functions, critical bases were identified and visited by the Inventory Developer. This step is important, since visiting bases which maintain the same or similar systems and overlooking bases which maintain unique or different systems may bias the task list and invalidate the results. Those bases and the reason visited are as follow:

Scott AFB IL - HQ AFCC - Initial Job Inventory Development
Peterson AFB CO - Space Command and Cheyenne Mountain
Offutt AFB NE - SACISD
Tinker AFB OK - EIC and Combat Communications Unit
Langley AFB VA - TACISD
Hickam AFB HI - PACISD
Yokota AB JA - Large Communications Group and Engineering
Installation Squadron
Clark AB RP - Large Communications Group covering much of the
Pacific area
Keesler AFB MS - Technical Training Center
Rhein-Main AB GE - Large Communications Group
Lindsey AS GE - Engineering Installation Group
Ramstein AB GE - EISD

APPROVED FOR PUBLIC RELEASE; DISTRIBUTION UNLIMITED

In addition to the personnel that participated in the interviews at the above locations, the AFCC Functional Manager and other members of the AFCC/LG staff provided invaluable assistance.

An instrument consisting of 424 tasks listed under 8 duty headings is the final result of this exhaustive effort. The survey instrument also included a background section that requested information such as job title, duty area, and job satisfaction data.

Data Collection

From September to December 1985, AFCC operational units worldwide administered the inventory to personnel performing duties in Maintenance/EI Workload Control. Participants were selected from a mailing list obtained from AFCC/LG. By direction of AFCC/LG, Quality Control and Material Control personnel were not surveyed.

Each individual who was administered the inventory first completed an identification and biographical information section and then checked each task performed in his current job. The participants then rated the tasks checked, on a 9-point scale, showing the relative time spent on that task as compared to all other tasks. The time spent ratings are measured on a scale which ranges from 1 (Very small amount of time) through 5 (About average amount of time) to 9 (Very large amount of time).

Time spent is defined as a relative measure of how much time individuals perceive themselves to spend on each task, as compared to all other tasks checked in the survey. To calculate time spent, all of an incumbent's ratings are assumed to account for 100 percent of his or her time spent on the job. The rating for each task is divided by the sum of all ratings, then multiplied by 100 to provide a relative percentage of time for each task. This procedure provides a basis for comparing tasks in terms of both percent members performing (where a task is checked by an incumbent) and relative time spent (based on the calculations from the 1-9 scale).

Survey Sample

Personnel were selected to participate in this survey to ensure an accurate representation across all AFCC units. All personnel performing in an AFCC Maintenance/EI Workload Control function were mailed survey booklets.

Table 1 shows the variety of AFSCs that participated in the survey. Also listed in this table is the percentage of respondents in the final survey compared to the number of assigned Maintenance/EI Workload Control positions. The 892 respondents included in the final sample represent 83 percent of assigned positions. Table 2 reflects the paygrade group distribution.

Task Factor Administration

In addition to the job inventory, selected senior personnel in the Maintenance/EI Workload Control functions completed a second booklet which provided separately processed information concerning either task difficulty (TD) or training emphasis (TE) ratings. TD refers to the length of time required for the average job incumbent to learn to do the task. TE refers to the importance of structured training for first-enlistment personnel. Structured training is training provided through any organized training method, such as resident technical school, field training detachments, mobile training teams, or formal OJT. TE and TD ratings were gathered for the Maintenance/EI Workload Control study. In the event AFCC/LG decides to create one or more new AFSCs, the data are available from USAFOMC.

Task Difficulty (TD). Each individual completing a TD booklet rated each task with which they were familiar. Tasks were rated on a 9-point scale, ranging from 1 (extremely low relative difficulty) to 9 (extremely high relative difficulty). The interrater reliability (as assessed through components of variance of standardized group means) of the TD data provided by 24 senior NCOs was .88, indicating acceptable agreement among raters. TD ratings were adjusted to give a rating of 5.00 for a task of average difficulty, with a standard deviation of 1.00. Data are then used to rank-order the inventory tasks in terms of relative difficulty.

Job Difficulty Index (JDI). Task difficulty is also used to compute a JDI for job groups identified in the analysis of the survey, to provide a relative measure of the difficulty of jobs in comparison to each other. The JDI is computed using the number of tasks performed and the average difficulty per unit time spent. (Thus, a group will have higher JDI as a result of spending more time on difficult tasks and performing more tasks.) After measurements are standardized, the index ranges from 1.0 for a simple job to 25.0 for a very complex job, with an average of 13.0.

Training Emphasis (TE). Individuals completing TE booklets were asked to rate all tasks on a 10-point scale from no training required to extremely heavy training required. Training emphasis ratings by AFCC senior NCOs showed high disagreement among raters. As a result, interrater reliability was too low to allow utilization of TE data. Consequently, training emphasis is not addressed in this report.

SPECIALTY JOBS (Career Ladder Structure)

An important function of the USAF Occupational Analysis program is to examine the job structure within a function. Based on responses to survey questions, the computer clustering program clusters individuals together based on similarity of tasks performed and the amount of time spent on those tasks. Analysis of the distinct jobs performed within the function and their relationship to each other results in a display of the structure of work within the function. This information can be used to understand current utilization of personnel and to identify job satisfaction trends that may impact management decisions.

Each individual in the survey performs a set of tasks called a Job. A group of individuals who perform many tasks in common, and spend similar amounts of time performing those tasks is called a Job Type. Job types having a substantial degree of similarity are grouped and called a Cluster. Those specialized job types too dissimilar to fit within a cluster are labeled Independent Job Types.

Overview of Specialty Jobs

Based on the similarity of tasks performed and the amount of time spent performing each task, four clusters and three independent job types were identified in the examination of the Maintenance/EI Workload Control functions (see Figure 1). These major jobs are described on the following pages. The group (GRP) number shown beside each title is a reference to computer-printed information and the letter "N" refers to the number of personnel in the group.

- I. Job Controllers Cluster (GRP046, N=403)
- II. NCOICs Cluster (GRP103, N=222)
- III. Readiness Center Controllers Cluster (GRP055, N=69)
- IV. EI Workload Control Personnel Cluster (GRP053, N=29)
- V. Plans and Scheduling Personnel IJT (GRP097, N=58)

FIGURE 1
FUNCTIONAL JOB GROUP REPRESENTATION

VI. Administrative Supervisors IJT (GRP116, N=6)

VII. Vehicle Control NCOs IJT (GRP090, N=5)

The respondents forming these groups accounted for 89 percent of the survey sample. Of the remaining 11 percent, most formed groups too small to be identified as a distinct job type in the analysis, and the functions they performed were too dissimilar to be grouped with the other job types. Some of the job titles given by respondents which were representative of these personnel included Telecom Operator, Missile Control Comm Operator, Quality Assurance Evaluator, and Teletype Resident Manager.

Group Descriptions

The following narratives describe the clusters and independent job types identified in the analysis. Tables 3 and 4 provide selected background and job satisfaction data for these groups. (Selected background and job satisfaction data, together with representative tasks for all identified groups, are listed in Appendix A.)

I. JOB CONTROLLERS CLUSTER (GRP046). This cluster contains 403 members, representing the largest group (45 percent) of the total sample. The cluster was formed based on the performance of tasks (an average of 32 are performed) by group members concerned primarily with job control operations. These personnel are assigned to four Maintenance Complex Categories, with the largest percentage being in Cat I (50 percent). Cat II contains 22 percent of the group members, Cat III 4 percent, and Cat IV only 1 percent. There were no members assigned to EI units; however, 14 percent indicated being assigned to other Maintenance Complexes. The average paygrade for group members is E-4, with 10 months being the average time in job control, and over 4 years (50 months) average for time in their respective career fields. Group members spend 80 percent of their relative job time on tasks involving job control duties. A sampling of tasks performed includes:

- issue job control numbers
- control unscheduled maintenance
- dispatch maintenance personnel
- operate MMICS terminals
- maintain status boards, graphs, or charts, other than for training
- act as a 24-hour focal point
- coordinate work activities with other units or agencies

Personnel within the cluster indicate holding 3-, 5-, or 7-skill levels in 20 different AFSCs, with AFSC 304X4, Ground Radio Communications, having the largest representation (94 members).

	1	14	3	21	7	17	0		

II. NCOICs CLUSTER (GRP103). The 222 airmen forming this group are distinguished from the other groups by their higher percentage of time spent on supervisory and administrative tasks. They average 12 years (145 months) Total Active Federal Military Service (TAFMS), with an average paygrade of E-6. These personnel function as supervisors of maintenance control, job control, plans and scheduling, readiness center, or as a senior controller. Tasks indicative of their job include:

- inform commander on equipment or mission status
- participate in meetings such as staff meetings, briefings, conferences, or workshops
- coordinate work activities with other units or agencies
- operate MMICS terminals
- coordinate with Chief of Maintenance on maintenance actions
- review correspondence or reports
- write correspondence

While supervising an average of 4 personnel, these group members perform the largest average number of tasks (78) of any group in the survey sample. Group members represent 23 different AFSCs, with AFSC 304X4, Ground Radio Communications, again having the largest number of respondents (74).

III. READINESS CENTER CONTROLLER CLUSTER (GRP055). This group differs from the Job Controllers group in that 79 percent of the 69 members are assigned to Information Systems Divisions. With an average paygrade of E-5, they average 13 months in the job and just under 8 years (94 months) TAFMS. While representing 8 different AFSCs, 19 members of this group (28 percent) hold AFSC 491X1, Information Systems Operator. They perform fewer tasks than the Job Controllers group (an average of 24), but the tasks performed are more readiness center involved than that of job control. Examples of the tasks performed are:

- prepare AFCC Forms 70 (NCMO Outage Report/Readiness Center Outage Report)
- perform readiness center procedures
- act as a 24-hour focal point
- maintain Mission Impairment Reports (MIREP) and logs
- maintain DD Form 1753 (Master Station Log)
- prepare readiness center briefings
- inventory classified materials or equipment

The large majority of this group (87 percent) perceived the use of their training as little or not at all in performing readiness center tasks. Seventy-one percent indicated their talents were being used little or not at all while working in the readiness center.

IV. EI WORKLOAD CONTROL PERSONNEL CLUSTER (GRP053). The 29 members of this group average more time in the job (25 months) than any of the other groups in the sample survey. With an average paygrade of E-6, 86 percent of these personnel find their job interesting. Group members spend 41 percent of their relative job time performing tasks related to EI Workload Control functions. Examples of these tasks are:

- maintain scheme working files
- manage scheme packages
- monitor status of Workload Management System(WMS)
- participate in meetings, such as staff meetings,
briefings, conferences, or workshops
- coordinate work activities with other units or
agencies
- prepare briefings

Seventy-nine percent of group members indicate being assigned to EI units, with AFSCs 304X4 and 361X1 having the majority (6 each) of the 14 different AFSCs found in EI Workload control functions.

V. PLANS AND SCHEDULING PERSONNEL (GRP097). The 58 airmen forming this independent job group are distinguished from the other groups by their higher percentage of time spent (70 percent) on tasks involving plans and scheduling. They average just over 8 years (98.6 months) TAFMS and have an average paygrade of E-5. Personnel in this group are assigned to all maintenance complex categories, except Cat IV, with the largest (69 percent) in Cat I. Typical of the average 34 tasks performed are:

- operate MMICS terminals
- verify MMICS listings
- operate MMICS on-line printers
- maintain master ID listings
- prepare preventive maintenance inspection
listings
- distribute computer products

Members of this group perceive the use of their talents as fairly well or better (72 percent), while representing 10 different AFSCs. As in some of the other groups, AFSC 304X4 has the largest number (22) assigned.

VI. ADMINISTRATIVE SUPERVISORS (GRP116). Spending 70 percent of their relative job time performing tasks pertaining to general supervisory, managerial, and administrative duties, the 6 members of this IJT report supervising an average of 5 personnel. With an average paygrade of E-7, personnel in this group are the senior group of the sample survey (averaging 18.2 years TAFMS). All are assigned to Cat I, II, or III maintenance complexes and hold 5 different AFSCs. Examples of tasks performed are:

- write correspondence
- review correspondence or reports
- interpret policies, directives, or procedures for subordinates
- prepare APRs or letters of evaluation (LOE)

Personnel in the field, when contacted, stated that the difference between their group and the NCOICs group was total supervisory responsibilities. All indicated this was possible only because of having experienced personnel working for them and they experienced little or no turnover of personnel in maintenance control areas.

VII. VEHICLE CONTROL NCOs (GRP090). This independent job group of 5 airmen is the smallest of any formed in the sample and represents less than one percent of the total sample. Eighty percent of the respondents indicate being assigned to Cat I maintenance complexes while performing tasks relating to control of vehicles and vehicle inspections. Typical tasks occupying most of their job time include:

- initiate AF Forms 171 (Request For Driver's Training And Addition to SF46)
- perform vehicle inspections, such as weekly and monthly
- monitor vehicle mileage and fuel consumption
- maintain vehicle control logs
- initiate AF Forms 1800 (Operator's Inspection Guide And Trouble Report)
- maintain vehicle charge out records of off-base trips

With an average paygrade of E-5, and 9 years TAFMS, personnel in this group average performing 23 tasks. One hundred percent of the members indicate little or no utilization of training received in their DAFSC.

Comparison of Functional Jobs

In addition to individual descriptions of each job, a comparison of some differences and similarities in the groups helps promote a better understanding of the Maintenance/EI Workload Control functions. Two areas of comparison of particular interest are job difficulty and job satisfaction indicators.

Job Difficulty. As previously mentioned, there are four major jobs and three independent job types in this function. The Job Difficulty Index (JDI), based on the number of tasks performed and the relative difficulty per unit time spent (see Task Factor Administration section), can be used to compare the difficulty of the different job groups (see Table 3 for a complete comparison). Those jobs related to Job Controllers, Readiness Center Controllers,

and Vehicle Control NCOs tend to have a lower JDI (10.4, 10.2, and 9.7, respectively) due to the difficulty of most tasks performed being below the mean of 5.0. The NCOICs group on the other hand, had the highest JDI (19.3) of any group. This high JDI is due to the performance of more tasks (average performing 78 tasks) and the number of supervisory tasks with high TD.

Job Satisfaction. As part of the background section of the survey, job incumbents were asked to respond to several questions, indicating how interesting they found their job, their perception on how well their job utilized their talents and training how satisfied they were with the sense of accomplishment gained from their work, and their intention to reenlist. Answers from these questions may help managers identify problem areas of concern.

Members of the groups discussed indicated the jobs performed are interesting, with the exception of Readiness Center Controllers (see Table 4 for group comparisons). Just over 50 percent of these respondents indicate they like their job. Readiness Center Controllers and Vehicle Control NCOs had a very low perception of use of their talents (28 and 20 percent, respectively), while the other groups indicated average to high use of their talents. With the exception of Administrative Supervisor's group (83 percent), all groups indicated very low utilization of training (less than 45 percent). Vehicle Control NCOs responded that their training was of no use at all (0 percent). Responses pertaining to sense of accomplishment by most groups were average except for Readiness Center Controllers and Vehicle Control NCOs, with 49 and 60 percent, respectively, indicating dissatisfaction with their jobs. However, reenlistment intentions for all groups were positive (52 percent or more of the respondents in each group indicated they will reenlist).

In summary, indications are that the Job Controllers, Readiness Center Controllers, and Vehicle Control NCO's jobs are not difficult to learn to perform, while the remaining groups in the survey have a higher than average (13.0) JDI. Job satisfaction question responses indicate problems in areas of perceived use of talents, training, and sense of accomplishment for some groups. This, in part, may be due to these personnel being pulled from their workshops to perform Maintenance Control functions. A good percentage of the airmen in the sample expressed positive reenlistment intentions.

IMPLICATIONS

Analysis of the AFCC Maintenance/EI Workload Control functions indicates a number of personnel in 30 different AFSCs are performing many of the same tasks, regardless of their job location, i.e., Job Control, NCOICs, or Readiness Center. Based upon analysis of the Maintenance/EI Workload Control functions, the following options are available to AFCC:

1. Continue with present way of manning Maintenance/EI Workload Control positions. This would enable the commander to continue to pull personnel from whatever work center deemed necessary to fill positions. But, with this option,

personnel will continue to perform out of their AFSC, thus continuing to put them at a disadvantage for promotion. Also, job satisfaction, a major factor to be considered in any AFSC, will continue to be low.

2. Create two new lateral AFSCs: one for Job Controllers, NCOICs, and Readiness Center Controllers; and a second AFSC for EI Workload Control personnel. Table 5 gives examples of common tasks performed by Job Controllers, NCOICs, and Readiness Center Controllers that could be combined into one lateral AFSC. Also, Table 5 shows the uniqueness of EI workload controllers, indicating they could be designated as a separate lateral AFSC. This option will allow for stabilization within the Maintenance/EI Workload Control functions and also allow personnel assigned to those functions an equal opportunity to compete for promotion.
3. Fill positions using only the AFSCs survey data show as having a majority in a specific function (Appendix B shows these majority AFSCs). Option 3 would enable commanders to fill positions using the AFSCs from work centers where they have the most work being accomplished in the unit. Again, as with option 1, job satisfaction must be taken into consideration, as well as the individuals chances for equal promotion opportunities.

Analysis indicates that option 2 best reflects the way work is being accomplished and would allow for a more stabilized and better trained work force. Also, option 2 would give personnel an equal chance for promotion. In the event option 2 is implemented by AFCC, USAFOMC will furnish the data necessary to help in developing Specialty Training Standards (STS) and Career Development Courses (CDC) for new AFSCs. If AFCC selects option 3, USAFOMC will provide the data necessary to determine which AFSCs to use.

E214 MAINTAIN DD FORMS 1753 (MASTER STATION LOG)	X	X	X	
E157 CONTROL SCHEDULED MAINTENANCE	X	X		
E302 PREPARE JOB STATUS DOCUMENTS	X	X		
E154 CONDUCT CREWSHIFT CHANGEOVER BRIEFINGS	X	X	X	
E225 MAINTAIN MISSION IMPAIRMENT REPORTS (MIREP) AND LOGS	X		X	
E216 MAINTAIN EQUIPMENT STATUS REPORTS	X	X	X	
A30 PREPARE BRIEFINGS	X	X	X	
E174 DIRECT ACTIONS AS MAINTENANCE CONTROLLER TO CORRECT DEFICIENCIES IN EQUIPMENT AND SYSTEMS	X	X		
E159 CONTROL SECURITY OF SAFES OR VAULTS	X	X	X	
E218 MAINTAIN JOB STATUS DOCUMENT FILES	X	X		X
E145 ADVISE COMMAND STAFF AGENCIES ON CURRENT OPERATIONAL STATUS OF EQUIPMENT OR SYSTEMS	X	X	X	

TABLE 5 (CONTINUED)

EXAMPLES OF COMMON TASKS PERFORMED BY 50 PERCENT OR MORE
GROUP MEMBERS

TASK	JOB CONTROLLERS CLUSTER	NCOICs CLUSTER	READINESS CENTER CONTROLLERS CLUSTER	EI WORKLOAD CONTROL CLUSTER
E290 PREPARE AFCC FORMS 70 (NCMO OUTAGE REPORT/ READINESS CENTER OUTAGE REPORT)	X	X	X	
E170 COORDINATE WITH SYSTEM MONITORS ON EQUIPMENT STATUS	X	X		
E158 CONTROL SECURITY OF FACILITIES OR CLASSIFIED MATERIALS	X	X	X	
E232 MAINTAIN STANDBY ROSTERS	X	X		
E148 ANNOTATE AF FORMS 2447 (TELEPHONE TROUBLE LOG)	X	X		
E168 COORDINATE POWER CHANGEOVERS OR OUTAGES WITH COMMUNICATIONS SUPPORT FACILITIES	X	X		
E155 CONDUCT PHYSICAL SECURITY INSPECTIONS OF FACILITIES	X	X		
E263 OPERATE MMICS ON-LINE PRINTERS	X	X		
E186 IMPLEMENT RECALL ROSTERS	X	X	X	
E260 OPERATE INTRA-BASE RADIO (IBR) EQUIPMENT	X	X	X	
E194 INVENTORY CLASSIFIED MATERIALS OR EQUIPMENT	X	X	X	
E228 MAINTAIN RECALL ROSTERS	X	X	X	
E211 MAINTAIN CIRCUIT OUTAGE REPORTS	X	X	X	
A19 PARTICIPATE IN MEETINGS, SUCH AS STAFF MEETINGS, BRIEFINGS, CONFERENCES, OR WORKSHOPS	X	X		X

APPENDIX A

SELECTED REPRESENTATIVE TASKS

FOR

FUNCTIONAL GROUPS

TABLE A1

GROUP ID AND TITLE: GRP043 - JOB CONTROLLERS CLUSTER
 GROUP SIZE: N=403 PERCENT OF SAMPLE: 45%
 AVERAGE GRADE: E-4 AVERAGE TIME IN JOB: 10 MONTHS
 AVERAGE TICF: 50 MONTHS AVERAGE TAFMS: 63 MONTHS

THE FOLLOWING ARE IN DESCENDING ORDER BY PERCENT MEMBERS PERFORMING:

TASKS	PERCENT MEMBERS PERFORMING
E197 ISSUE JOB CONTROL NUMBERS	97
A1 COORDINATE WORK ACTIVITIES WITH OTHER UNITS OR AGENCIES	90
E187 INFORM COMMANDER ON MISSION OR EQUIPMENT STATUS	90
E176 DISPATCH MAINTENANCE PERSONNEL	89
E161 CONTROL UNSCHEDULED MAINTENANCE	87
E264 OPERATE NMICS TERMINALS	86
E335 SUBMIT MIREPs	86
E324 REPORT OUTAGES TO HIGHER HEADQUARTERS	85
A5 DETERMINE WORK PRIORITIES	83
E169 COORDINATE WITH CHIEF OF MAINTENANCE ON MAINTENANCE ACTIONS	82
E233 MAINTAIN STATUS BOARDS, GRAPHS, OR CHARTS , OTHER THAN FOR TRAINING	82
E225 MAINTAIN MISSION IMPAIRMENT REPORTS (MIREP) AND LOGS	78
E143 ACT AS 24-HOUR FOCAL POINT	72
E154 CONDUCT CREWSHIFT CHANGEOVER BRIEFINGS	72
A30 PREPARE BRIEFINGS	69
E232 MAINTAIN STANDBY ROSTERS	69
E157 CONTROL SCHEDULED MAINTENANCE	69
E159 CONTROL SECURITY OF SAFES OR VAULTS	68
E158 CONTROL SECURITY OF FACILITIES OR CLASSIFIED MATERIALS	62
E263 OPERATE NMICS ON-LINE PRINTERS	58

TABLE A2

GROUP ID NUMBER AND TITLE: GRP103 - NCOICs CLUSTER
 GROUP SIZE: N=222 PERCENT OF SAMPLE: 25%
 AVERAGE GRADE: E-6 AVERAGE TIME IN JOB: 15 MONTHS
 AVERAGE TICF: 115 MONTHS AVERAGE TAFMS: 145 MONTHS

THE FOLLOWING ARE IN DESCENDING ORDER BY PERCENT MEMBERS PERFORMING:

TASKS	PERCENT MEMBERS PERFORMING
A1 COORDINATE WORK ACTIVITIES WITH OTHER UNITS OR AGENCIES	96
A19 PARTICIPATE IN MEETINGS, SUCH AS STAFF MEETINGS, BRIEFINGS, CONFERENCES, OR WORKSHOPS	94
A5 DETERMINE WORK PRIORITIES	94
E187 INFORM COMMANDER ON EQUIPMENT OR MISSION STATUS	94
E169 COORDINATE WITH CHIEF OF MAINTENANCE ON MAINTENANCE ACTIONS	87
B43 DIRECT DEVELOPMENT OR MAINTENANCE OF STATUS BOARDS, GRAPHS, OR CHARTS	85
A30 PREPARE BRIEFINGS	85
E233 MAINTAIN STATUS BOARDS, GRAPHS, OR CHARTS, OTHER THAN FOR TRAINING	84
E324 REPORT OUTAGES TO HIGHER HEADQUARTERS	84
B58 INTERPRET POLICIES, DIRECTIVES, OR PROCEDURES FOR SUBORDINATES	84
E225 MAINTAIN MISSION IMPAIRMENT REPORTS (MIREP) AND LOGS	84
E264 OPERATE MMICS TERMINALS	82
E197 ISSUE JOB CONTROL NUMBERS	81
B36 CONDUCT BRIEFINGS, OTHER THAN CREW BRIEFINGS	81
D131 MAINTAIN TRAINING RECORDS, CHARTS, OR GRAPHS	81
D121 COUNSEL TRAINEES ON TRAINING PROGRESS	81
D118 CONDUCT OJT	81
E161 CONTROL UNSCHEDULED MAINTENANCE	80
C111 VERIFY MAINTENANCE MANAGEMENT INFORMATION AND CONTROL SYSTEM (MMICS) LISTINGS	79
A12 DEVELOP WORK METHODS AND PROCEDURES	78

TABLE A3

GROUP ID NUMBER AND TITLE: GRP055 - READINESS CENTER CONTROLLERS
CLUSTER

GROUP SIZE: 69

PERCENT OF SAMPLE: 8%

AVERAGE GRADE: E-5

AVERAGE TIME IN JOB: 13 MONTHS

AVERAGE TICF: 71 MONTHS

AVERAGE TAFMS: 94 MONTHS

THE FOLLOWING ARE IN DESCENDING ORDER BY PERCENT MEMBERS PERFORMING:

TASKS	PERCENT MEMBERS PERFORMING
E214 MAINTAIN DD FORMS 1753 (MASTER STATION LOG)	91
E337 TRACK AVAILABILITY OF COMMANDERS	90
E275 PERFORM READINESS CENTER PROCEDURES	88
E194 INVENTORY CLASSIFIED MATERIALS OR EQUIPMENT	88
E255 MAINTAIN MISSION IMPAIRMENT REPORTS (MIREP) AND LOGS	84
E187 INFORM COMMANDER ON EQUIPMENT OR MISSION STATUS	83
E143 ACT AS 24-HOUR FOCAL POINT	81
E290 PREPARE AFCC FORMS 70 (NCMO OUTAGE REPORT/READINESS CENTEROUTAGE REPORT)	80
E324 REPORT OUTAGES TO HIGHER HEADQUARTERS	75
E247 MAKE ENTRIES ON AFCC FORMS 210 (REPORT OF AIRCRAFT MISHAP/HATR)	75
E266 OPERATE SMALL COMPUTER EQUIPMENT	74
E335 SUBMIT MIREPS	71
B67 PREPARE READINESS CENTER BRIEFINGS	70
E322 RECEIPT AND PROCESS CLASSIFIED MESSAGES OR REPORTS AFTER DUTY HOURS	68
E204 MAINTAIN AFCOMSEC FORMS 16 (COMSEC ACCOUNT DAILY- SHIFT INVENTORY)	65
A30 PREPARE BRIEFINGS	62
E145 ADVISE COMMAND STAFF AGENCIES ON CURRENT OPERATIONAL STATUS OF EQUIPMENT OR SYSTEMS	62
E315 PROCESS COMMANDERS SPECIAL INTEREST (CSI) REPORTS	62
E159 CONTROL SECURITY OF SAFES OR VAULTS	60
E158 CONTROL SECURITY OF FACILITIES OR CLASSIFIED MATERIALS	58

TABLE A4

GROUP ID NUMBER AND TITLE: GRP 053 - EI WORKLOAD CONTROL PERSONNEL
CLUSTER

GROUP SIZE: 29

PERCENT OF SAMPLE: 3%

AVERAGE GRADE: E-6

AVERAGE TIME IN JOB: 25 MONTHS

AVERAGE TICF: 142 MONTHS

AVERAGE TAFMS: 161 MONTHS

THE FOLLOWING ARE IN DESCENDING ORDER BY PERCENT MEMBERS PERFORMING:

TASKS	PERCENT MEMBERS PERFORMING
A19 PARTICIPATE IN MEETINGS, SUCH AS STAFF MEETINGS BRIEFINGS, CONFERENCES, OR WORKSHOPS	100
G392 MAINTAIN SCHEME WORKING FILES	97
A1 COORDINATE WORK ACTIVITIES WITH OTHER UNITS OR AGENCIES	97
A30 PREPARE BRIEFINGS	97
G396 MONITOR STATUS OF WORKLOAD MANAGEMENT SYSTEM (WMS)	90
G393 MANAGE SCHEME PACKAGES	86
G391 INPUT DATA INTO PRODUCTION REPORTING SYSTEM	79
E266 OPERATE SMALL COMPUTER EQUIPMENT	79
G412 UPDATE WMS	76
G405 PROJECT 60-90 DAY WORKLOAD	76
G387 COORDINATE ANTICIPATED WORK STOPPAGE MESSAGES	76
G388 COORDINATE WORK STOPPAGE MESSAGES	76
B68 WRITE CORRESPONDENCE	72
G397 OPERATE WMS TERMINALS	72
G394 MONITOR AFCC FORMS 1202 (INITIAL JOB STATUS DAILY UPDATE)	69
G404 PROCESS SCHEME COMPLETION DOCUMENTS	69
B36 CONDUCT BRIEFINGS, OTHER THAN CREW BRIEFINGS	69
G383 ACCEPT OR REJECT EI WORKLOAD	69
C83 EVALUATE INSTALLATION MILESTONES	66
E233 MAINTAIN STATUS BOARDS, GRAPHS, OR CHARTS, OTHER THAN FOR TRAINING	62

TABLE A5

GROUP ID NUMBER AND TITLE: GRP097 - PLANS AND SCHEDULING PERSONNEL
 GROUP SIZE: 58 PERCENT OF SAMPLE: 7%
 AVERAGE GRADE: E-5 AVERAGE TIME IN JOB: 13 MONTHS
 AVERAGE TICF: 80 MONTHS AVERAGE TAFMS: 99 MONTHS

THE FOLLOWING ARE IN DESCENDING ORDER BY PERCENT MEMBERS PERFORMING:

TASKS	PERCENT MEMBERS PERFORMING
E264 OPERATE MMICS TERMINALS	98
E223 MAINTAIN MASTER IDENTIFICATION (ID) LISTINGS	93
A1 COORDINATE WORK ACTIVITIES WITH OTHER UNITS OR AGENCIES	93
E263 OPERATE MMICS ON-LINE PRINTERS	91
C111 VERIFY MAINTENANCE MANAGEMENT INFORMATION AND CONTROL SYSTEM (MMICS) LISTINGS	90
E305 PREPARE PREVENTIVE MAINTENANCE INSPECTION LISTINGS	90
E303 PREPARE MONTHLY OR QUARTERLY MAINTENANCE PLAN	90
E319 PROCESS TIME COMPLIANCE TECHNICAL ORDERS	90
E240 MAKE ENTRIES ON AF FORMS 2001 (NOTIFICATION OF TCTO KIT REQUIREMENTS	90
E177 DISTRIBUTE COMPUTER PRODUCTS	88
E172 DEVELOP AND ASSIGN EQUIPMENT IDENTIFICATION NUMBERS	87
E157 CONTROL SCHEDULED MAINTENANCE	83
E197 ISSUE JOB CONTROL NUMBERS	81
E281 PREPARE AF FORMS 1530 (PUNCH CARD TRANSCRIPT)	78
E317 PROCESS MMICS BACKGROUND PROGRAM REQUIREMENTS	76
A19 PARTICIPATE IN MEETINGS, SUCH AS STAFF MEETINGS, BRIEFINGS, CONFERENCES, OR WORKSHOPS	76
E149 ANNOTATE DEVIATIONS TO MONTHLY MAINTENANCE PLANS	74
E218 MAINTAIN JOB STATUS DOCUMENT FILES	72
E302 PREPARE JOB STATUS DOCUMENTS	71
A6 DEVELOP EQUIPMENT OPERATION OR MAINTENANCE SCHEDULES	71

TABLE A6

GROUP ID NUMBER AND TITLE: GRP116 - ADMINISTRATIVE SUPERVISORS
 GROUP SIZE: 6 PERCENT OF SAMPLE: LESS THAN ONE
 AVERAGE GRADE: E-7 AVERAGE TIME IN JOB: 14 MONTHS
 AVERAGE TICF: 202 MONTHS AVERAGE TAFMS: 219 MONTHS

THE FOLLOWING ARE IN DESCENDING ORDER BY PERCENT MEMBERS PERFORMING:

TASKS	PERCENT MEMBERS PERFORMING
B66 WRITE CORRESPONDENCE	100
C109 REVIEW CORRESPONDENCE OR REPORTS	100
B58 INTERPRET POLICIES, DIRECTIVES, OR PROCEDURES FOR SUBORDINATES	100
A19 PARTICIPATE IN MEETINGS, SUCH AS STAFF MEETINGS, BRIEFINGS, CONFERENCES, OR WORKSHOPS	100
C104 PREPARE APRS OR LETTERS OF EVALUATION (LOE)	100
B40 COUNSEL PERSONNEL ON PERSONAL OR MILITARY- RELATED MATTERS	100
C99 INDORSE AIRMAN PERFORMANCE REPORTS (APR)	100
C97 EVALUATE USE OF WORKSPACE, EQUIPMENT, OR SUPPLIES	100
A1 COORDINATE WORK ACTIVITIES WITH OTHER UNITS OR AGENCIES	100
C107 PREPARE REPLIES TO INSPECTION REPORTS	100
C106 PREPARE RECOMMENDATIONS FOR AWARDS OR DECORATIONS	100
E327 REVIEW DAILY DOCUMENT REGISTER (DO-4)	100
B59 JUSTIFY MANPOWER REQUIREMENTS	100
A34 SCHEDULE TEMPORARY DUTY, LEAVES, OR PASSES	100
A2 DETERMINE BUDGET OR FINANCIAL REQUIREMENTS	100
E169 COORDINATE WITH CHIEF OF MAINTENANCE ON MAINTENANCE ACTIONS	83
B43 DIRECT DEVELOPMENT OR MAINTENANCE OF STATUS BOARDS, GRAPHS, OR CHARTS	83
C81 EVALUATE INDIVIDUALS FOR RECOGNITION	83
A12 DEVELOP WORK METHODS OR PROCEDURES	83

TABLE A7

GROUP ID NUMBER AND TITLE: GRP090 - VEHICLE CONTROL NCOs
 GROUP SIZE: 5 PERCENT OF SAMPLE: LESS THAN ONE
 AVERAGE GRADE: E-5 AVERAGE TIME IN JOB: 12 MONTHS
 AVERAGE TICF: 107 MONTHS AVERAGE TAFMS: 110 MONTHS

THE FOLLOWING ARE IN DESCENDING ORDER BY PERCENT MEMBERS PERFORMING:

TASKS	PERCENT MEMBERS PERFORMING
E188 INITIATE AF FORMS 171 (REQUEST FOR DRIVER'S TRAINING AND ADDITION TO STANDARD FORM 46)	100
E277 PERFORM VEHICLE INSPECTIONS, SUCH AS WEEKLY AND MONTHLY	100
E256 MONITOR VEHICLE MILEAGE AND FUEL CONSUMPTION	100
E237 MAINTAIN VEHICLE CONTROL LOGS	100
E189 INITIATE AF FORMS 1800 (OPERATOR'S INSPECTION GUIDE AND TROUBLE REPORT (GENERAL PURPOSE VEHICLE)	100
E236 MAINTAIN VEHICLE CHARGEOUT RECORD OF OFF-BASE TRIPS	100
E191 INITIATE SF FORMS 91 (OPERATOR'S REPORT OF MOTOR VEHICLE ACCIDENT)	100
A4 DETERMINE TRANSPORTATION REQUIREMENTS	80
E266 OPERATE SMALL COMPUTER EQUIPMENT	80
E233 MAINTAIN STATUS BCARDS, GRAPHS, OR CHARTS, OTHER THAN FOR TRAINING	80
E338 TYPE RECORDS, REPORTS, OR CORRESPONDENCE	80
C103 PERFORM SELF-INSPECTIONS	80
E327 REVIEW DAILY DOCUMENT REGISTER (DO-4)	80
A19 PARTICIPATE IN MEETINGS, SUCH AS STAFF MEETINGS, BRIEFINGS, CONFERENCES, OR WORKSHOPS	80
C111 VERIFY MAINTENANCE MANAGEMENT INFORMATION AN CONTROL SYSTEM (MMICS) LISTINGS	80
C100 INVESTIGATE ACCIDENTS OR INCIDENTS	80
E252 MANAGE FUEL ISSUE COUPONS	60
C109 REVIEW CORRESPONDENCE OR REPORTS	60
C107 PREPARE REPLIES TO INSPECTION REPORTS	60
F350 DRIVE SMALL GOVERNMENT VEHICLES, SUCH AS PICKUPS OR PASSENGER VEHICLES	60
